

Concrete
columns and
walls built in
hours, not
days!

Build Architectural Masonry Columns for Less — Much Less!

Moderra® mortarless masonry systems eliminate all the inconveniences and costs of traditional masonry construction.

Moderra Builds with Half the Labor

Combine lightweight Moderra® units with patented technology and you get fast, easy, and economical construction. Moderra's innovative, mortarless design is unaffected by weather and can install for half the cost of traditional masonry.

Complete Design Flexibility

Moderra offers designers unlimited flexibility. Vertical and horizontal construction methods allow for ashlar, running bond, and stacked columns and walls. Moderra's high-density concrete blocks have a natural split-face or smooth texture to complement any design.

Mortarless Construction is Strong and Fast

Moderra's innovative systems join one block to the next, ensuring proper alignment, unit interlock, and a positive mechanical connection between all units. Because Moderra is mortarless, it builds incredibly fast.

Engineered, Tested & Guaranteed

The Moderra® system has been engineered, tested and is covered by a **50 year limited warranty**.
